\*Standard scopes only.

Standard scopes are encompassed by the following characteristics: 4 mm to 10 mm, straight optical system, without operating channels. Examples include arthroscopes, bronchoscopes, laparoscopes and cystoscopes. Herzog Surgical, Inc. will also repair and maintain most specialty rigid scopes on a quoted basis. Specialty scopes are encompassed by the following characteristics: smaller than 4mm in diameter, larger than 10mm in diameter, including scopes with operating channels and off-set optical systems. Examples include carpal tunnel scopes, operating scopes, renal scopes, semi flexible scopes and da Vinci scopes. The preceding is provided as a general set of examples only and is not intended to be all-inclusive.
